

## Fine Art Prints

Giclee fine art prints are produced with archival pigment inks on museum-grade paper. One inch border is added around the artwork to provide space for signing, matting, or framing.

Prints can be shipped rolled in a tube or in flat boxes if they are matted or framed.

Frames are available in three colors: black walnut and oak/natural. These modern ½ inch wide frames are best suited for prints, since they don't detract from the artwork they display. The frames are fitted with plexiglass to provide shatter-free protection. But giclee prints on paper are such high quality that can be displayed without glass or plexiglass if glare is an issue.
